Hi Kaggler,

Today's Assignment

1. [Read this tutorial](#) (from Lesson 4 of the Python course)
2. [Complete this exercise](#) (from Lesson 4 of the Python course)
3. [Read this tutorial](#) (from Lesson 5 of the Python course)
4. [Complete this exercise](#) (from Lesson 5 of the Python course)

What You'll Learn

In **Lesson 4 (Lists)**, you'll learn how to use Python lists to store ordered collections of values. Lists are incredibly useful when writing code to manage several related variables.

In **Lesson 5 (Loops and List Comprehensions)**, you'll learn an efficient way to repeatedly execute code. With list comprehensions, you'll often be able to condense code that would have taken several lines to just a single line!

Happy learning,
Alexis
